

Mouse Pads

Product Description

This irresistibly soft surface demands attention, creates lasting first impressions and unforgettable promotions.

Imprint Method:

Dye Sublimation - 4 Color Process and Spot Color (PMS). Dye Sublimation is the primary printing process used to create unforgettable fabric mouse pads. After computer-controlled offset presses print heat-activated dyes onto special transfer paper, precise heat and pressure forces each individual dye particle to explode into the fabric. The result is a clean, crisp and brilliant spot (PMS) or full color imprint that is permanently dyed into the fabric surface.

Surface: SoftTouch Plush Surface - White

Thickness: Heavy Duty Rubber and your choice of 1/16", 1/8", 3/16" and _".

Size: 7 1/2" x 8", 7 1/2" x 8 1/2", 8" x 9 1/2", 8" Round, Coasters, Graphic Flow, and custom shapes and sizes available.

Production Specifications:

Standard orders are generally shipped 15 working days after receipt of customer approved camera-ready or output-ready art.
